

Laboratory Co-ordinator

Name: Yuri A.W. Shardt

E-mail: yuri.shardt@ualberta.ca. Note when sending me an e-mail, please place the words “ChE 576” in the header.

Office: CME 274

Important Information

This semester the ChE 576 project will consist of a single experimental laboratory held in room CME 274 combined with one theoretical sections. Although the final report is to be completed individually, the experimental laboratories will be run in groups of 4. A sign-up sheet has been posted on the door of CME 274. Unless other arrangements are made with me, all group members are to attend on the appointed day. If there are scheduling issues, contact me as soon as possible to resolve them.

All students should print-out a copy of the manual and bring it to the laboratories. The students are expected to read the manual beforehand and come prepared to the laboratories in order to maximise both the students and co-ordinator’s time. The manual is optimised for double-sided printing and is fully hyperlinked.

The completed project is 20% of the final mark. Further information on the breakdown of the marks is given in the project manual.

Note that the completion of the theoretical component of the project is not dependent on the experimental component of the project and should be started as soon as possible, as there is quite a bit of work to do.

Project Schedule

Date	Task
January 20 th , 2012	Introduction to the project during the class
March 26 th to 30 th , 2012	Part III: Investigation of MPC in CME 274
April 20 th , 2011	Completed Project Due
